

ING Bank N.V.
Issue of 1,000,000
Long Commodity Best Sprinters
under the
Certificates Programme

Any person making or intending to make an offer of the Certificates may only do so:

- (i) in that Public Offer Jurisdiction mentioned in the Paragraph Distribution of Part B below, provided such person is of a kind specified in that paragraph; or
- (ii) otherwise in circumstances in which no obligation arises for the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Directive or to supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer.

Neither the Issuer nor any Dealer has authorised, nor do they authorise, the making of any offer of Certificates in any other circumstances.

PART A – CONTRACTUAL TERMS

Terms used herein shall be deemed to be defined as such for the purposes of the conditions set forth in the General Certificate Conditions and the relevant Product Conditions contained in this Base Prospectus dated 18 June 2015 as supplemented from time to time (the “Prospectus”) which constitutes a base prospectus for the purposes of Directive 2003/71/EC, as amended, to the extent that such amendments have been implemented in the relevant Member State of the European Economic Area, (the “**Prospectus Directive**”). This document constitutes the Final Terms applicable to the issue of Certificates described herein for the purposes of Article 5.4 of the Prospectus Directive (as implemented by the Dutch Financial Supervision Act (*Wet op het financieel toezicht*) and its implementing regulations) and must be read in conjunction with such Prospectus. Full information on the Issuer and the offer of the Certificates is only available on the basis of the combination of these Final Terms and the Prospectus. Copies of the Prospectus may be obtained from ING Bank N.V. at Foppingadreef 7, 1102 BD Amsterdam, The Netherlands (E-mail: info@sprinters.nl) .

Prospective investors should carefully consider the section “Risk Factors” in the Prospectus.

ISSUE SPECIFIC SUMMARY OF THE CERTIFICATES

Summaries are made up of disclosure requirements known as “Elements”. These elements are numbered in Sections A to E (A.1 to E.7). This summary contains all the Elements required to be included in a summary for the Certificates and the Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements. Even though an Element may be required to be inserted in a summary because of the nature of the Certificates and the Issuer, it is possible that no relevant information can be given regarding the Element. In this case, a short description of the Element should be included in the summary with the mention of “Not Applicable”.

Section B - Issuer

Element	Title	
B.1	Legal and commercial name of the Issuer	ING Bank N.V. (the " Issuer ")
B.2	The domicile and legal form of the Issuer, the legislation under which the Issuer operates and its country of incorporation	The Issuer is a public limited company (<i>naamloze vennootschap</i>) incorporated under the laws of The Netherlands on 12 November 1927, with its corporate seat (<i>statutaire zetel</i>) in Amsterdam, The Netherlands.
B.4b	A description of any known trends affecting the Issuer and the industries in which it operates	<p>The results of operations of the Issuer are affected by demographics and by a variety of market conditions, including economic cycles, banking industry cycles and fluctuations in stock markets, interest and foreign exchange rates, political developments and client behaviour changes.</p> <p><i>Macroeconomic developments in 2014</i></p> <p>In 2014, the development trajectories of the US and the UK on the one hand, and Europe on the other, diverged. The US economy continued to grow steadily and the Federal Reserve (Fed) was able to end part of its unconventional monetary policies, the monthly buying of securities (i.e. quantitative easing). For investors worldwide, one question dominated the picture in the second half of the year: when would the Fed start raising rates? This is expected sometime in 2015. The UK also saw healthy economic growth with interest rate increases expected there in 2015 as well.</p> <p>Meanwhile in the Eurozone, the recovery remained weak, unstable and uneven. Persistently low inflation (averaging 0.4 percent in 2014) and worries about imminent deflation prompted the European Central Bank (ECB) to take a series of unconventional measures. The main refinancing rate was lowered to 0.05 percent in 2014, while the interest rate on deposits held by banks at the ECB moved into negative territory, to -0.2 percent. The ECB implemented conditional long-term refinance operations and announced purchase programmes for covered bonds and asset-backed securities.</p> <p>The Dutch economy, with its housing market stabilised and domestic demand no longer acting as a drag on growth, performed slightly better than the Eurozone average.</p> <p>Meanwhile the Italian recession continued. The French economy underperformed while the German economy decelerated as the loss of momentum in emerging markets, ongoing tensions in eastern Ukraine and sanctions imposed on and by Russia affected exports. A weakening euro during 2014 was one positive for European exports.</p> <p>With the European economic recovery still distinctly lacklustre, the last quarter of 2014 saw the ECB repeatedly allude to possible additional measures in 2015. Quantitative easing was subsequently announced in January 2015.</p> <p>Financial markets rallied for most of 2014, with US stock markets reaching record highs. Yields on US Treasury bonds moved with changing expectations for the timing of future Fed interest hikes. European stock markets followed the US upwards, although as the year progressed the effects of the crisis in Ukraine and the weakness of the European recovery started to</p>

weigh more on markets. European bond yields fell and spreads between European sovereigns decreased in line with ECB policy.

Progress on regulatory initiatives that are most relevant to the Issuer

November 2014, saw the start of the Single Supervisory Mechanism (SSM). The ECB took over responsibility for the supervision of the major European banks. The ECB had already prepared the ground with a comprehensive assessment of all supervised banks to test the stability of the financial system in stressed conditions.

In 2014, agreement was also reached on the Single Resolution Mechanism (SRM) consisting of a Single Resolution Board (SRB) and a Single Resolution Fund (SRF). The SRM will apply to banks covered by the SSM to ensure an orderly resolution of failing banks within the Eurozone.

The Capital Requirements Directive IV (CRD IV) came into force on 1 January 2014. This, and later refinements, implemented European regulation on capital, liquidity and other aspects such as remuneration. Broadly speaking, CRD IV is an essential step towards a single rule book in the European Union.

The Bank Recovery and Resolution Directive (BRRD) also came into effect in 2014. This requires European banks and authorities to put recovery and resolution plans in place and mandates the establishment of national resolution funds to be financed by banks.

In 2014, EU agreement was reached regarding a revision of the Deposit Guarantee Scheme (DGS) directive. EU Member States are obliged to build up ex-ante deposit guarantee funds of an (in principle) minimum target size of 0.8 percent of covered deposits in 10 years. Banks' contributions will be risk based taking into account EBA guidance. The DGS directive will be applicable as of 2015 and the Issuer will start to contribute to the Dutch DGS fund as of mid-2015.

Further, there have been various regulatory developments that impact the product offerings and therefore the customers of the Issuer directly, currently or in future years. Other important reforms in this regard seek to enhance an efficient and competitive internal market for consumers by removing barriers to cross-border activity and promoting a level playing field between providers, e.g. the European Mortgage Credit Directive. Besides this, the improvement of the European payments market also remains an important objective, and is addressed by the Payments Services Directive II.

Finally, the Dutch Parliament has approved the introduction of the Banker's Oath, a set of principles that reconfirms the industry's commitment to ethical behaviour. From 1 January 2015, it includes a disciplinary sanction mechanism for all Netherlands-based employees. Oath taking has been a requirement already for Members of the Executive and Supervisory Boards since 1 January 2013. The adopted legislation extends this to all internal and external employees working in The Netherlands who have a contract of employment with the Issuer.

Fluctuations in equity markets

The operations of the Issuer are exposed to fluctuations in equity markets. The Issuer maintains an internationally diversified and mainly client-related trading portfolio. Accordingly, market downturns are likely to lead to declines in securities trading and brokerage activities which it executes for customers and therefore to a decline in related commissions and trading

Section C - Securities

Element	Title	
C.1	A description of the type and class of securities being offered and/or admitted to trading, including any security identification number	<p>The Certificates described in this summary are financial instruments which may be issued under the Certificates Programme.</p> <p>The Certificates are open ended investment instruments without a fixed maturity or expiration date and are designated “Best Certificates” for the purpose of the Programme, which can be exercised by the Certificateholder.</p> <p>The Certificates can be terminated by the Issuer and may automatically terminate if the Underlying (as defined below) reaches a pre-determined level (a “Stop Loss Event”).</p> <p>The Certificates are Long Certificates (as defined below).</p>

C.2	Currency of the securities issue	The Certificates are denominated in EUR
C.5	A description of any restrictions on the free transferability of the securities	Certain customary restrictions on offers, sale and delivery of Certificates and of the distribution of offering material in the United States, the European Economic Area, France, The Netherlands, Poland and the United Kingdom apply.
C.8	A description of rights attached to the Certificates, including ranking and any limitations to those rights	<p><i>Status</i></p> <p>The Certificates will constitute direct, unsubordinated and unsecured obligations of the Issuer and will rank <i>pari passu</i> among themselves and (save for certain debts required to be preferred by law) equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding.</p> <p><i>Taxation</i></p> <p>The Issuer is not liable for or otherwise obliged to pay any tax, duty, withholding or other payment which may arise as a result of the ownership, transfer, exercise or enforcement of any Certificate and all payments made by the Issuer are subject to any such tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted.</p> <p><i>Governing law</i></p> <p>The Certificates will be governed by, and construed in accordance with, English law.</p> <p><i>Optional termination</i></p> <p>The Certificates can be terminated by the Issuer following an Issuer Call and can also be exercised by Certificateholders on specified dates, in each case, upon notice.</p> <p><i>Issue Price</i></p> <p>EUR 0.89</p>
C.9	Interest: The interest rate and the due dates for interest	Not Applicable. The Certificates do not bear interest.

	Redemption: The maturity date, amortisation and repayment procedures Representative of the debt security holders	The Certificates will entitle the holder thereof (on due exercise and subject to certification as to non-U.S. beneficial ownership) to receive a cash amount (if any) calculated in accordance with the relevant terms and conditions. Not Applicable
C.10	If the security has a derivative component, an explanation of how the value of the investment is affected by the value of the underlying instrument	The Certificates are Long Certificates. “ Long Certificates ” are certificates that are designed to enable the investor to profit from rising markets by tracking the Underlying. If the value of the Underlying rises, the value of the Long Certificate is also expected to rise, subject to the cost of financing provided by the Issuer, movements in any applicable foreign exchange rate and any expenses. The difference between a Long Certificate and an ordinary certificate is that in the case of a Long Certificate, the amount needed to invest to give the same participation rate in the Underlying is usually considerably less.
C.11	Application for admission to trading and distribution in a regulated market	Application is expected to be made by the Issuer (or on its behalf) for the Certificates to be admitted to trading on Euronext Amsterdam with effect from 15 February 2016
C.15	Description of how the value of the investment is affected by the value of the underlying instrument(s)	Certificates track the Underlying in a linear manner on an open ended basis. The amount needed to invest in a Certificate to give the same participation rate in the Underlying as a direct investment in the Underlying is considerably less. Therefore, the percentage gain if the Underlying rises and the percentage loss if the Underlying falls, is higher in Certificates than in a direct investment in the Underlying.
C.16	The expiration or maturity date of the derivative securities	The Certificates are open ended investment instruments without a fixed maturity or expiration date, which can be exercised by Certificateholders on an exercise date on notice. The Certificates can be terminated by the Issuer upon notice and may automatically terminate following a Stop Loss Event.
C.17	A description of the settlement procedure of the securities	The Certificates are cleared through (and payments in respect of the Certificates shall accordingly be made in accordance with the rules of Euroclear Netherlands
C.18	A description of how the return on derivative securities takes place	Each issue of Certificates will entitle the holder thereof (on due exercise and subject to certification as to non-U.S. beneficial ownership) to receive a cash amount (if any) on the settlement date, calculated by reference to the value of the Underlying and subject to the deduction of financing costs and expenses. Following a Stop Loss Event, Certificateholders will receive zero return on the Certificates.
C.19	Final reference price of the underlying	The final reference price of the Underlying shall be an amount equal to the value of the Underlying on the relevant valuation date, determined by the Calculation Agent by reference to a publicly available source.
C.20	A description of the type of the underlying and where the information on the underlying can be found	The Certificates are linked to a commodity(the “ Underlying ”). Information on the underlying can be found at Bloomberg (Initially Bloomberg code: COJ6 <Cmdty> and after the first Rollover Date the Bloomberg page referring to the Substitute Asset).

Section D - Risks

Element	Title	
D.2	Key information on key risks that are specific to the Issuer or its industry	<p>Because the Issuer is part of a financial services company conducting business on a global basis, the revenues and earnings of the Issuer are affected by the volatility and strength of the economic, business and capital markets environments specific to the geographic regions in which it conducts business. The ongoing turbulence and volatility of such factors have adversely affected, and may continue to adversely affect the profitability and solvency of the Issuer. The Issuer has identified a number of specific factors which could adversely affect its business and ability to make payments due under the Certificates. These factors include:</p> <ul style="list-style-type: none"> ● adverse capital and credit market conditions ● the default of a major market participant ● changes in financial services laws and/or regulations ● continued risk of resurgence of turbulence and on-going volatility in the financial markets and the economy generally ● inability to increase or maintain market share ● inability of counterparties to meet their financial obligations ● market conditions and increased risk of loan impairments ● interest rate volatility and other interest rate changes ● failures of banks falling under the scope of state compensation schemes ● inflation and deflation ● inability to manage risks successfully through derivatives ● inability to retain key personnel ● inability to protect intellectual property and possibility to be subject to infringement claims ● deficiencies in assumptions used to model client behaviour for market risk calculations ● liabilities incurred in respect of defined benefit retirement plans ● inadequacy of risk management policies and guidelines ● regulatory risks ● claims from customers feeling misled or treated unfairly ● ratings downgrades or potential downgrades ● operational risks such as systems disruptions or failures, breaches of security, cyber attacks, human error, changes in operational practices or inadequate controls ● adverse publicity, claims and allegations, litigation and regulatory investigations and sanctions ● implementation of ING's Restructuring Plan ● EC imposed limitations on ING ● competitive and other disadvantages resulting from the Restructuring Plan ● failure to achieve intended reductions in costs, risk and leverage under Restructuring Plan
D.3	Key information on the key risks that are specific to the Certificates:	<p>The following key risks may arise in respect of the Certificates:</p> <ul style="list-style-type: none"> ● The Certificates may be terminated by the Issuer and may automatically terminate if the Underlying reaches a pre-determined level. Investors in the Certificates should be aware that their entire investment may be lost if the Underlying is at an unfavourable level upon exercise or termination, as the case may be. ● A feature of the Certificates is the stop-loss which, if breached, will result in the early termination of the Certificates. In the case of the Certificates, following such Stop Loss Event the cash amount to be received by a Certificateholder will always be zero.

		<ul style="list-style-type: none"> ● The Certificates are Long Certificates which entail particular risks. “Long Certificates” are certificates that are designed to enable the investor to profit from rising markets by tracking the Underlying. If the value of the Underlying rises, the value of the long Certificate is expected to rise, subject to the cost of financing provided by the Issuer, movements in any applicable foreign exchange rate and any expenses. ● There may not be a secondary market in the Certificates. As a consequence, liquidity in the Certificates should be considered as a risk. In the event that such a secondary market does not develop, an investor selling the Certificates is unlikely to be able to sell its Certificates or at prices that will provide him with a yield comparable to similar investments that have developed a secondary market. ● The Issuer and/or its affiliates may enter into transactions or carry out other activities in relation to the Underlying which may affect the market price, liquidity or value of the Underlying and/or the Certificates in a way which could be adverse to the interest of the Certificateholders. ● The Certificates convey no interest in the Underlying to the investors. The Issuer may choose not to hold the Underlying or any derivative contracts linked to the Underlying. ● The Calculation Agent may make adjustments as a result of certain corporate actions affecting the Underlying. In making such adjustments, the Calculation Agent is entitled to exercise substantial discretion and may be subject to conflicts of interest. ● Certificates not exercised in accordance with the Conditions will (where exercise is required) expire worthless. ● The Issuer may elect to cancel the Certificates early should U.S. withholding tax apply to any current or future payments on the Certificates. ● The Issuer may terminate the Certificates early if it determines that the performance of its obligations under the Certificates or that maintaining its hedging arrangement (if any) is no longer legal or practical in whole or in part for any reason. ● Credit ratings assigned to the Certificates may not reflect the potential impact of all the risks that may affect the value of the Certificates. ● The investment activities of investors may be restricted by legal investment laws and regulations, or by the review or regulation by certain authorities. ● Under certain circumstances the Issuer may make modifications to the Certificates without the consent of the Certificateholders which may affect the Certificateholders’ interest. ● Expenses may be payable by investors. ● The holders may not receive payment of the full amounts due in respect of the Certificates as a result of amounts being withheld by the Issuer in order to comply with applicable laws.
D.6	Risk warning that investors may lose value of entire investment or part of it	<p>The capital invested in the Certificates is at risk. Consequently, the amount a prospective investor may receive on redemption of its Certificates may be less than the amount invested by it and may be zero.</p> <p>Investors will lose up to the entire value of their investment if:</p> <ul style="list-style-type: none"> (a) the investor sells its Certificates prior to the scheduled redemption in the secondary market at an amount that is less than the initial purchase price; (b) the Issuer is subject to insolvency or bankruptcy proceedings or some other event which negatively affects the Issuer’s ability to repay amounts due under the Certificates; (c) the Certificates are redeemed early for reasons beyond the control of
